Frequently Asked Questions — Customer Support Knowledge Base

BILLING & PAYMENTS

Q: Why was I charged twice for the same order?

A: Duplicate charges can occur due to a temporary authorization hold placed by your bank alongside the actual charge. These usually resolve within 3-5 business days. If the charge persists after 5 days, please contact our billing team with your order ID and we will issue an immediate refund for the duplicate amount.

Q: How do I request a refund?

A: To request a refund, go to My Account > Orders > Select Order > Request Refund. Refunds are processed within 5-7 business days to your original payment method. For subscription refunds, please contact support within 48 hours of the billing date.

Q: My payment failed but money was deducted. What should I do?

A: If your payment failed but money was deducted, this is typically a temporary authorization hold. The amount will be automatically released within 2-3 business days. If not released, contact your bank with the transaction reference number, or reach out to our billing support team.

Q: How do I update my payment method?

A: Go to Account Settings > Payment Methods > Add New Card. You can add credit/debit cards, UPI, or net banking. Make sure to set the new payment method as default before your next billing cycle.

Q: What is your subscription cancellation policy?

A: You can cancel your subscription at any time from Account Settings > Subscription > Cancel Plan. Your access continues until the end of the current billing period. We do not offer prorated refunds for unused days in the current billing cycle.

Q: I was charged after cancelling my subscription. What do I do?

A: If you were charged after cancellation, please verify your cancellation confirmation email. If you have a confirmed cancellation and were still charged, this is an error on our end. Contact billing support immediately with your cancellation confirmation and we will issue a full refund within 24 hours.

Q: Do you offer discounts or promo codes?

A: Yes! We regularly offer seasonal discounts and referral bonuses. Promo codes can be applied at checkout under 'Apply Coupon'. Each promo code can only be used once per account. Promo codes cannot be applied to already discounted plans.

Q: What payment methods do you accept?

A: We accept all major credit and debit cards (Visa, Mastercard, Amex), UPI payments, net banking, and select digital wallets. International cards are accepted. EMI options are available for orders above Rs. 5000.

TECHNICAL SUPPORT

Q: I cannot log into my account. What should I do?

A: If you cannot login, first try resetting your password using 'Forgot Password' on the login page. Check your spam folder for the reset email. If you use Google/social login, ensure you're using the correct linked account. For persistent issues, clear browser cache and cookies, or try a different browser. If none of these work, contact technical support with your registered email address.

Q: The app is not working / crashing on my device. How do I fix it?

A: First, try force closing the app and reopening it. If the issue persists, clear the app cache from Settings > Apps > SupportAI > Clear Cache. Ensure your app is updated to the latest version. If the problem continues, uninstall and reinstall the app. For web app issues, try clearing browser cache with Ctrl+Shift+Delete.

Q: I forgot my password. How do I reset it?

A: Click 'Forgot Password' on the login screen and enter your registered email address. You will receive a password reset link within 2 minutes. The link is valid for 15 minutes. If you don't receive the email, check your spam folder or try resending. If your email is no longer accessible, contact support for account recovery.

Q: My data is not syncing across devices. What should I do?

A: Sync issues are usually caused by poor internet connectivity or being logged into different accounts on different devices. Ensure you're connected to a stable internet connection and logged into the same account on all devices. Try manually refreshing the app. If sync still fails, log out from all devices and log back in.

Q: I am getting an error code while using the service. What does it mean?

A: Common error codes: Error 404 means the page or resource was not found. Error 500 means a server-side issue, usually temporary. Error 403 means access denied, check your account permissions. Error 401 means unauthorized, try logging out and back in. For other error codes, note the exact code and message and contact technical support.

Q: How do I change my account email address?

A: Go to Account Settings > Profile > Edit Email. You will receive a verification link on your new email address. Click the link to confirm the change. Note that your old email will receive a notification about this change. If you did not request this change, contact support immediately.

Q: The website is very slow. What can I do?

A: Slow performance can be due to high server load or local internet issues. Try refreshing the page, clearing browser cache, or switching to a different browser. Disable browser extensions temporarily as they can cause slowdowns. Check if the issue persists on mobile data vs WiFi. If the issue is widespread, check our status page at status.supportai.com.

Q: How do I delete my account and data?

A: To delete your account, go to Account Settings > Privacy > Delete Account. Read the warnings carefully as this action is permanent and cannot be undone. All your data will be permanently deleted within 30 days as per our data retention policy. Make sure to download any data you want to keep before deleting.

GENERAL INFORMATION

Q: What is SupportAI and what services do you offer?

A: SupportAI is an AI-powered customer support platform that helps businesses automate and manage their customer service operations. We offer intelligent ticket classification, automated responses, priority detection, conversation history tracking, and seamless integration with existing support workflows.

Q: How do I contact customer support?

A: You can reach our support team through multiple channels: Live Chat available 24/7 on our website, Email support at support@supportai.com with response time of 4-6 hours, Phone support at 1800-XXX-XXXX available Monday to Friday 9 AM to 6 PM IST, or by submitting a ticket through this portal.

Q: What are your support hours?

A: Our AI support is available 24/7. Human agent support is available Monday to Friday from 9 AM to 9 PM IST, and Saturday from 10 AM to 6 PM IST. We are closed on Sundays and national holidays. For urgent issues outside business hours, use the priority flag when submitting your ticket.

Q: How long does it take to resolve a support ticket?

A: Resolution times depend on the priority level. High priority tickets are addressed within 2-4 hours. Medium priority tickets are resolved within 24 hours. Low priority tickets are typically resolved within 48-72 hours. Complex technical issues may take longer but we will keep you updated throughout the process.

Q: How do I track the status of my support ticket?

A: Once you submit a ticket, you receive a unique ticket ID via email. You can track your ticket status at any time by logging into your account and visiting Support History, or by replying to the ticket confirmation email. You will also receive email notifications when the status of your ticket changes.

Q: Can I upgrade or downgrade my plan?

A: Yes, you can change your plan at any time from Account Settings > Subscription > Change Plan. Upgrades take effect immediately and you are charged the prorated difference. Downgrades take effect at the start of your next billing cycle. You will not lose any data when changing plans.

Q: Is my data secure with SupportAI?

A: Yes, we take data security very seriously. All data is encrypted in transit using TLS 1.3 and at rest using AES-256 encryption. We are GDPR compliant and follow SOC 2 Type II standards. We never sell your data to third parties. You can request a full data export or deletion at any time from your account settings.

Q: Do you have a mobile app?

A: Yes! SupportAI is available on both iOS (App Store) and Android (Google Play). The mobile app supports all core features including ticket submission, chat support, account management,

and push notifications for ticket updates. The app requires iOS 13 or Android 8.0 and above.
